

Environment Policy

1st March 2008

Our policy is to minimise the environmental impact of our activities and seek, by a means of continuous improvement, to utilise existing and emerging technologies to enable us to fulfil this goal.

The Directors, Darren Turner, John Tilby and Diana Turner recognise and accept their responsibilities under UK legislation for ensuring that all aspects of the company activities are compliant with UK environmental law.

O Turner Insulation Limited will meet our environmental objectives by:

- **Ensuring all road journeys are made in the most suitable size and type of vehicle, thereby minimising the use of fossil fuels and limiting CO₂ emissions;**
- **Ensuring that all company vehicles are properly serviced and maintained;**
- **Continuing to recycle 100% of all office generated waste paper;**
- **Continuing to recycle other waste streams such as packaging and steel;**
- **Sourcing raw materials from sustainable resources where this option is available;**
- **Minimising the use of hazardous substances and disposing of any hazardous wastes safely through a licensed contractor;**
- **Utilising recycled paper for up to 50% of our office activities and ensuring that all other paper resources are derived from sustainable sources;**
- **Reducing our carbon footprint using the means outlined above and procuring supplies of electricity from sustainable sources such as wind or hydro-electric where this option is practicable;**
- **Minimising energy usage by the use of low energy light bulbs, where practicable, and ensuring that our buildings are heated only when occupied;**
- **Informing our employees of our environmental goals and providing them with the correct guidance to enable them to minimise the impact of their activities: for example by providing information showing the link between driving style and fuel consumption;**
- **Seek confirmation from our suppliers that they too have taken a positive and proactive approach to their environmental responsibilities. Where such an assurance cannot be obtained alternative suppliers will be sought; and**
- **Auditing our activities on a regular basis to confirm our goals and objectives are met.**
